# Apple Predeployment Configuration Solutions

Insight

Why Insight for Apple predeployment?

As an Apple Authorized Reseller and Apple Authorized Service Provider, Insight is committed to your business success. We provide comprehensive solutions for all Apple® devices, from basic setup through deployment — so you can focus on your goals, while we do the rest.

Whether you're embarking on a new mobility initiative or improving what you already have in place, we'll make sure you're up to speed and using your Apple devices efficiently. Here are some of the ways we can help you maximize your investment:

- Leading Apple partner with full support for Apple Device as a Service
- 2,300+ product and industry certifications
- ISO 9001:2008-certified advanced integration labs
- Dedicated Apple Certified Support Professionals (ACSPs)

How Apple predeployment configuration helps your business

Whether you're looking to reduce the overhead of day-to-day management, cut costs through streamlined configuration or solve issues faster with higher-level support, Insight delivers the solutions and expertise to help you meet your business goals. Our deep partnership with Apple gives you access to best-in-class devices and services to build a modern, mobile infrastructure with ease and simplicity. Together we'll help you:

- Simplify procurement with our customizable e-commerce platform.
- Minimize downtime with zero-touch provisioning and full configuration.
- Stay ahead of the curve with the latest iOS® upgrades.
- Ensure you're connected with data connectivity testing.
- Keep track of your devices with asset tagging and etching.

Insight is your expert connection to Apple solutions that help your business run smarter.

 Corporate Reseller

Predeployment configuration services for iOS devices

Power testing and visual inspection for damage	1–3% of all devices shipped straight from the manufacturer have a defect of some sort. We'll ensure the products you receive meet our rigorous quality standards.
Facilitation of carrier activation on LTE-enabled devices	Our technicians will activate new devices on your corporate account prior to shipment — so they're ready to use as soon as they arrive.
Mobile Device Management (MDM) enrollment and registration	We'll facilitate all the steps needed to fully configure new devices prior to shipment, reducing demands on your IT team while expediting the implementation process.
Laser etching	Simultaneously promote your brand and deter theft with optional logo etching on the back of all iOS® devices.
Asset tagging and custom labeling	Simplify asset management with custom tags and device labels added to each device prior to shipment, along with optional reporting on serial/asset numbers.
Kitting with accessories and peripherals	We'll help you minimize shipping costs by consolidating iOS devices with required or optional accessories all in one package.
Shrink-wrapping of Original Equipment Manufacturer (OEM) box following configuration	We make it easy to provide your end users with ready-to-use devices — while preserving the gratification of unwrapping the Apple® experience.

*All services shown above can be purchased as stand-alone options or bundled together with prices starting at under $10 per unit (kitting of unconfigured device with accessories/peripherals). Contact your Insight representative for more details.
